

The tools your team wishes it had.

Gloo is a build studio founded by **go-to-market operators** who got tired of clunky software and started building their own. Now we build for other teams: internal tools, dashboards, AI agents, and automations shaped around how they actually work.

WHY TEAMS BRING US IN

1

Operators, not an agency

We carried quota and ran GTM teams. We know the spreadsheet workarounds and the tribal knowledge because we lived in them.

2

Weeks, not quarters

Kickoff to live tool in 2–3 weeks. No configuration project, no roadmap queue. Lovable, Claude, and n8n are how we move that fast.

3

Adoption is the deliverable

Anyone can ship a tool now. Most die in three months because nobody owned rollout. We train the team and keep improving it.

OUR NICHE, AND OUR RANGE

Home turf: GTM teams

SALES

ACCOUNT MANAGEMENT

CS

REVOPS

The tooling gap between a CRM and a spreadsheet, where quota-carrying teams lose hours every week.

Department and industry agnostic

OPS

FINANCE

HR

COMPLIANCE

FIELD

Same playbook, any function or industry. Anything stuck in a spreadsheet or an email thread is fair game.

 Forecasting Dashboard

 QBR Builder

 BDR Locator

 Renewal Tracker

 Document Processor

 Report Automator

 Data Sync Hub

 KPI Command Center

PROOF

2–3 wks

Kickoff to live, working tool

89%

Adoption rate across builds

170%

More demos booked for one AM team

\$150K+

Saved vs. hiring in-house

CASE STUDY · FRANCHISE OPERATIONS

One of Canada's largest pizza chains 150+ stores across 5 districts

Their finance manager rebuilt the same report by hand every week: exporting orders, converting pack sizes, computing compliance ratios, then emailing static sheets to each district manager. Now it's one dashboard. Upload the weekly export, each manager sees only their own stores, and AI flags the outliers.

Plus the **site-scouting tool** their team uses to evaluate new franchise locations.

HOW WE WORK WITH LOVABLE

Sales engine

We bring GTM-led accounts and land Lovable inside teams that never shipped an app.

Enablement

We turn non-technical teams into builders: workshops, first builds, a champion.

Done-for-you builds

No internal manpower? We do one-time builds and hand them over ready to run.

Community

We run build events and hackathons, like a 200-person She Builds in Toronto.

One size fits none. Solutions custom to you.
